Re: Packaging, Transportation and Disposal of Obsolete/Waste Chemicals  
RESI Proposal Number 05446

Dear Mr. Shipman:

Rader Environmental Services, Inc. (Rader) is pleased to submit the following quotation for the handling and disposal of obsolete chemicals awaiting removal at the Galion High School facility (Room C223A). This quotation has been developed upon information provided by Galion City Schools.

Rader serves a wide range of public and private sector clients. We employ a well-trained staff experienced in handling environmental waste management projects. With expertise in the laboratory packaging field, Rader is able to utilize cost-efficient and environmentally responsible disposal methods. Working closely with clients, Rader provides reliable, timely and personal service. Some of the advantages of our methods of operation are listed below.

Specialization in one of expertise-- waste management. This enables us to focus our thorough knowledge of current disposal regulations on our client's highly individual disposal requirements. In many instances we develop programs of ongoing waste removal, providing our clients with economical and continuity of services.

OSHA-trained technicians and chemists for labeling, packaging, manifesting and loading materials. All aspects of waste packaging and pickup are handled expeditiously by these qualified Technicians.

Rader evaluates recycling of materials to minimize long-term liabilities.

An experienced in-house customer service staff trained in current RCRA and DOT regulations efficiently prepares documentation for waste removal projects, and is always available to answer your questions.

We handle all details of your waste removal projects, from providing hazardous waste labels to securing certificates of disposal.

### **SCOPE OF WORK**

Rader will complete waste profile forms (on the basis of generator knowledge and/or waste characterization analytical results), shipping manifests, land restriction forms, and any other documentation to secure waste approval.

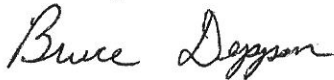

Rader will provide on-site personnel to secure packaging and labeling all waste leaving the generating facility according to all local, state, federal DOT and RCRA regulations. We will arrange for a licensed waste hauling firm to pickup and deliver the waste to the appropriate EPA-permitted disposal facilities.

### **PRICING**

Rader will complete the scope of work described above for the lump sum price of \$3,250.00. This price shall remain valid for thirty (30) days, and payment terms are net thirty (30) days.

Rader appreciates the opportunity to provide this quotation and looks forward to serving your waste management needs. If you have any questions, please call us at (419)408-1171.

Sincerely,  
Rader Environmental  
Services, Inc.
