The negative health effects of tobacco use for both the users and nonusers, including the effects of secondhand smoke and vapor/aerosol exposure, particularly in connection with second-hand smoke, are well established. The term "tobacco" includes any product containing, made of, or derived from tobacco or nicotine (including synthetic nicotine) that is intended for human consumption or is likely to be consumed, whether inhaled, absorbed, or ingested by any other means, including, but not limited to, a cigarette, a cigar, pipe tobacco, chewing tobacco, snuff, or snus; any electronic smoking device and any substances that may be aerosolized or vaporized by such device, whether or not the substance contains nicotine; an e-cigarette (including, but not limited to, "JUUL," "NJOY," "BREEZE," "Puff Bar," etc.), e-cigar, e-pipe, vape pen, or e-hookah; any product that contains tobacco, is derived from tobacco, contains nicotine, or e-cigarettes and other electronic smoking devices (including but not limited to "JUULs"); but does not include any cessation product approved by the United States Food and Drug Administration for use as a medical treatment to reduce or eliminate nicotine or tobacco dependence.
