

SmartNet

NCOCC maintains a maintenance contract with its current network equipment vendor, Cisco Systems, Inc. on behalf of our districts. By pooling the resources of each individual district, NCOCC is able to increase our purchasing power to negotiate a substantial discount and allows the NCOCC staff to work efficiently with the Cisco Technical Assistance Center.

SmartNet provides the following benefits to NCOCC and its districts

- Hardware replacement¹
- Operating system software updates and upgrades²
- Around the clock, global access to the Cisco Technical Assistance Center for NCOCC Technical Staff
- Access to Cisco's extensive knowledge base and tools for NCOCC Technical Staff
- Cisco software upgrades within common revision levels³
- Installation and configuration support

NCOCC currently maintains 2 different contracts for hardware maintenance and a contract for software maintenance. The first contract SNT, provides 8X5XNBD service. This service provides replacement parts during an 8 hour business day, Monday through Friday. Parts are generally delivered the next business day, if the replacement is requested by 5:00pm to the local Cisco depot.

The second hardware contract is SNTP which provides 24X7X4 service. This service provides replacement parts during any 24 hour period, Monday through Sunday. Parts are guaranteed to be delivered within 4 hours from the local Cisco depot.

Each spring NCOCC provides the Cisco reseller with an equipment list. The Cisco reseller creates a quote for each district. The district should create a PO to the Cisco reseller and send it to NCOCC for processing. Once the PO is processed by Cisco, a contract is issued to NCOCC for SmartNet.
